Experience

Lead Frontend Engineer @ T-Digital by Deutsche Telekom

Aug 2023 - Present

Projects: telekom.de, Magenta View

Technologies: TypeScript, React.js, Vue.js, Node.js, Styled Components, SCSS

- Technical leader of a highly performant team of 4 frontend engineers supporting multiple Deutsche Telekom web apps across different tech stacks in the Magenta View platform
- Solutioning, refinement, estimation, task alignment and delivery overview of product stories
- Contact point for cross-team collaboration
- Contributor to company-wide initiatives (accessibility, technical debt, AI adoption)
- Core contributor to critical business journeys integrating MagentaView and OneShop platforms used by 22000 Deutsche Telekom agents
- Participation in tech interviews for new hires and internal mobility programs

As a Senior Frontend Engineer until Oct 2024:

- Member of the Sales Catalog team responsible for the CMS platform of the OneShop ecommerce web app where thousands of categories, products, variants are configured by agents for 6 different Deutsche Telekom NatCos
- End to end contributor on major initiatives
 - Node.js v18 update of the frontend application
 - Early adoption of central DT [design system](#) components
 - Level AA accessibility conformance of the CMS platform (400% zoom, 200% text resize, 4.5:1 contrast ratio)
 - Entities migration between non-prod and production environments

Frontend Software Engineer @ Skroutz

Mar 2021 - Aug 2023

Projects: skroutz.gr, merchants.skroutz.gr

Technologies: Ruby on Rails, Hotwire, JavaScript ES6+, React.js, SCSS

- Implemented frontend improvements to the web app based on technical and business stories targeting UX, performance and design alignment across journeys
- Developed A/B testing scenarios to validate new functionalities
- Implemented business features end to end on the merchant's platform supporting over 8000 shops
- Actively contributed to key vertical tech initiatives such as internationalization (i18n), analytics, and the internal UI framework
- Mentored 2 junior frontend engineers, successfully guiding them to the next engineering level
- Presented new features in company-wide weekly meetings with over 500 attendees
- Part of a fast-paced and cross-functional agile team

Frontend Software Engineer @ SingularLogic

Mar 2019 – Mar 2021

Projects: [Liknoss Screen](#), Cosmote eSurvey web portal, [Fraagile](#), [Prolepsis](#), [sephora.gr](#)

Technologies: Typescript, React.js, Material UI, SCSS

- Designed, developed, and shipped the user interfaces for clients in the public/private sector and the European Union (AAL/Erasmus+ 2020-2021) within a team of 2 backend engineers and a product analyst
- Implemented feature requests on ongoing projects
- Provided guidance and assistance to team members on frontend related topics
- Held workshops to hand over the codebase to clients' development teams

Fullstack Developer @ efood & Click Delivery (Delivery Hero Group)

Jan 2015 – Mar 2019

Projects: [efood.gr](#), [clickdelivery.gr](#), [deliveras.gr](#)

Technologies: React.js, jQuery, PHP, SCSS, Bootstrap 4

- Delivered a then record-high 100,000 daily orders as a member of the agile web team consisting of engineers, QA testers, designers, and product owners
- End-to-end feature implementation on all delivery platforms (efood, clickdelivery, deliveras)
- Assumed ownership of all React.js components (cart, menu item, offers, checkout)

As a Fullstack Developer at Click Delivery until Mar 2016:

- Part of the high-growth Click Delivery startup team that scaled from 2,000 to 8,000 daily orders, acquired by efood/Delivery Hero
- Engineered catalog and order-tracking integrations for major franchises, including Pizzafan and Domino's

Projects

[skateparks.gr](#)

Community driven skatepark directory platform focused around Greece and Europe. 4300 monthly visitors (April 2026).

Technologies: Ruby on Rails 8, Hotwire, Tailwind CSS

[dimitristrechis.com](#)

My personal blog where I write about software engineering.

Technologies: Typescript, Next.js, Tailwind CSS, Ghost CMS

[liberal.gr](#) (2021-2024)

I designed and developed the administration dashboard for the revamped news website. The dashboard is a crucial tool for Liberal's editorial team, allowing them to efficiently publish and manage over 300 articles daily.

Technologies: Typescript, React.js, React Query, dnd-kit, Material UI

Technical Skills

Languages: JavaScript, TypeScript, Node.js, Ruby, HTML5, CSS

Frontend: React.js, Vue.js, Hotwire, Redux, Redux Saga, React Query, single-spa

Backend: Express.js, Ruby on Rails

Testing: React Testing Library, Jest, Vitest

Styling: SCSS, Styled Components, Tailwind CSS

Databases: PostgreSQL

Tools: Webpack, Vite, ESLint, Prettier, Biome, Lefthook, GitHub/GitLab/BitBucket, Docker, Jira

Continuous Professional Development

Certifications

Professional Scrum Product Owner™ I (PSPO I), Scrum.org, 2024 - [certificate](#)

Frontend Masters (2020 - Present)

- JavaScript: The Hard Parts, Will Sentance
- Deep JavaScript Foundations, Kyle Simpson
- JavaScript: The Recent Parts, Kyle Simpson
- Angular 9 Fundamentals, Lukas Ruebbelke
- TypeScript 3 Fundamentals v2, Mike North
- Web Performance Fundamentals, Todd Gardner
- Vue 3 Fundamentals, Ben Hong
- Front-End System Design, Evgenii Ray

Udemy

- The Complete React Native + Hooks Course 2020 Edition, Stephen Grider

Additional Training

- Just Javascript - Dan Abramov (React Core Team, ex-Meta)

Languages

- Greek: Native language
- English: Full professional proficiency, CELF Michigan State University (C2)
- German: Elementary proficiency, Zertifikat B1
